PROFESSIONAL SUMMARY

MERN & Next.js Full-Stack Developer with expertise in MongoDB, Express.js, React.js, Node.js, and Next.js. Experienced in building RESTful APIs, JWT authentication, SSR/SSG apps, and responsive UIs. Strong in Redux, database optimization, performance tuning, and scalable deployment.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux, Zustand, TailwindCSS, ShadCN
Backend: Node.js, Express.js, MongoDB, Zod, REST API, Socket.io, Prisma
Tools & Technologies: Git, React Query, Figma, NPM

EXPERIENCE

Freelance Web Developer February 2026 – Present
Remote

- Building full-stack applications with **Next.js**, **TypeScript**, and **Server Actions** for efficient client-server communication.
- Leveraging modern **AI-assisted development tools** to improve development speed and code quality.

Full-Stack Developer August 2025 – February 2026
Willowy Infotech Pvt. Ltd., Calicut, Kerala, India

- Built production-scale **ERP, CRM, and E-Commerce platforms** using Next.js, Node.js, and Prisma with **RBAC** and multi-gateway payments.
- Developed secure, modular full-stack architectures with authentication and admin dashboards for business operations.

Web Developer Intern August 2024 – August 2025
BridgeOn, Malappuram, Kerala

- Delivered 3+ full-stack projects using **Next.js**, **TypeScript**, and **MongoDB**.
- Collaborated using Git with branching, pull requests, and code reviews in a team environment.

PROJECTS

DURIO – Cross-Platform Personal Productivity Platform April 2025 – Present
A full-stack productivity platform built with Next.js, shipping on both web and Android from a single codebase.

- Built a modular **feature-first architecture** using **Next.js 15**, **Prisma**, and **MongoDB**, enabling scalable development across multiple productivity modules.
- Implemented a cross-platform authentication system using **NextAuth.js** on web and native **Google Sign-In** on Android, backed by a shared user model.
- Packaged the application as a native Android app with **Capacitor**, integrating **Firebase Cloud Messaging** and platform-specific mobile capabilities.

SCOPEO – Real-Time Monitoring & AI-Powered Error Analysis February 2025 – April 2025
A full-stack monitoring platform for tracking server health, uptime, and application errors via custom SDK integration.

- Built a **real-time monitoring dashboard** using **Next.js 15**, **WebSockets**, and secure authentication with **NextAuth.js**.
- Developed a scalable **Express + TypeScript** backend with **MongoDB**, **Redis**, and scheduled Cron jobs for efficient monitoring.
- Implemented **AI-powered error analysis** to automatically identify issues and provide debugging suggestions.

SCOPEO Monitoring Library (Open Source) February 2025 – April 2025
A lightweight performance monitoring SDK for Node.js services.

- Developed a modular SDK for monitoring **uptime, latency, traffic, and system resources** with minimal runtime overhead.
- Implemented algorithms for **millisecond-level response analysis** and performance bottleneck detection.
- Designed a reusable, class-based architecture for seamless integration across Node.js applications.
