PROFESSIONAL SUMMARY

Full Stack Developer building production web applications since 2024 with **React.js, Next.js, Node.js, Express.js, MongoDB**, and **TypeScript**. Contributed to **10+ production ERP, CRM, and e-commerce platforms** in team environments, while independently owning projects end-to-end – from a solo-maintained CRM to a freelance client application delivered from requirements through deployment. Experienced in **RESTful API design**, **role-based access control**, and real-time features using **WebSockets**.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux, Zustand, TailwindCSS, ShadCN, Capacitor
Backend: Node.js, Express.js, MongoDB, PostgreSQL, Prisma, Redis (Upstash), WebSockets (Socket.io), Firebase (FCM), Zod, REST API
Auth & Payments: JWT, OAuth, NextAuth.js, Better Auth, Razorpay, Stripe, Cashfree
Tools & Deployment: Git, GitHub, Vercel, Render, Netlify, Postman, Figma, Jira, Notion

EXPERIENCE

Freelance Web Developer February 2026 – Present
Remote

- Solo-developing a full-stack **community management platform** for a client – handling resident records, certificates, registration, and financial tracking – using **Next.js**, **TypeScript**, **MongoDB**, and **Prisma**, in direct client contact from requirements through deployment.
- Implemented **JWT-based authentication** per client requirements and deployed on **Vercel**.

Full-Stack Developer August 2025 – February 2026
Willowy Infotech Pvt. Ltd., Calicut, Kerala, India

- Worked as a backend-focused full-stack developer on a **7-member team**, contributing to **10+ production ERP, CRM, and E-Commerce platforms** built with **Next.js**, **Node.js**, and **Prisma**.
- Independently maintained a live **CRM platform** for an educational institution as sole developer, handling feature development, bug fixes, and production support – including resolving a timezone-handling bug causing incorrect timestamps.
- Built a **two-sided marketplace** for service providers and clients with recurring subscription plans and a free trial period; also developed a **Professional Service Automation (PSA)** platform alongside one other developer.
- Designed and implemented a **role-based access control (RBAC)** system supporting 5-6 roles; integrated payment gateways (**Razorpay, Stripe, Cashfree**) and authentication methods including **JWT, OAuth, and Better Auth**.

Web Developer Intern August 2024 – August 2025
BridgeOn, Malappuram, Kerala

- Originated the idea for and served as primary backend contributor to **SCOPEO** (detailed in Projects) – a real-time server monitoring platform built as a 4-member intern team project – authoring roughly 90% of its monitoring SDK; coordinated daily standups and task planning for the team.
- Built multiple independent practice projects, including a social feed app with real-time chat and notifications, to develop MERN stack proficiency.

PROJECTS

DURIO – Cross-Platform Personal Productivity Platform April 2025 – Present
A full-stack productivity platform built with Next.js, shipping on both web and Android from a single codebase.

- Built a modular **feature-first architecture** using **Next.js 15**, **Prisma**, and **MongoDB**, enabling scalable development across multiple productivity modules.
- Implemented a cross-platform authentication system using **NextAuth.js** on web and native **Google Sign-In** on Android, backed by a shared user model.
- Packaged the application as a native Android app with **Capacitor**, integrating **Firebase Cloud Messaging**.

SCOPEO – Real-Time Monitoring & AI-Powered Error Analysis February 2025 – April 2025

- Built a **real-time monitoring dashboard** with **AI-powered error analysis** using **Next.js 15**, **WebSockets**, and **NextAuth.js**; backend built with **Express + TypeScript**, **MongoDB**, **Redis**, and scheduled Cron jobs.
- Developed the accompanying **open-source monitoring SDK** for Node.js, tracking uptime, latency, traffic, and system resources with millisecond-level response analysis and minimal runtime overhead.
